# Wilson Industries Inc.

Manufacturer's Representatives Since 1968

**AMTI PRODUCTS** - SLICE® and SHRINK® machines with solutions to serve a variety of precision cutting requirements: multi-conductor, flat ribbon cable, heat shrink tubing, insulation material, convoluted tubing, hose, or wire. The SHRINK® is a turbulent, airflow convection-style conveyor oven easily applied to increase manufacturing velocities & limit process variations. Reduce your labor & scrap costs + increase throughput & consistency.

**APR** (Advanced Package Rework) / Scorpion Rework Systems (DESCO) - rework machines for BGA, CGA, QFN, LGA, and SMD component desoldering and rework, and BGA re-balling. (Formerly Metcal Scorpion / OK Industries). January 2018, OK/Metcal sold the APR-SCORPION BGA rework line to Desco. Desco owns the APR-SCORPION product line, has all of the APR parts stock, and handles the direction for these machines.

**We offer training, recalibration, and full support of the Scorpion Rework System.**

**BARON BLAKESLEE** - "The Original American Solvent Vapor Degreasing Company.", since 1920, offering complete solvent cleaning strategies of Airless Vacuum Vapor Degreasers and Open Top Vapor Degreasers, compatible with halogenated, hydrocarbon & modified alcohol solvents. Also offering aqueous precision & industrial cleaning equipment, coating systems and more.

**BOFA** - offers leading edge technology in filtration systems and fume extraction for fume and dust, even for high temperature particulate and gases. They pride themselves as a world leader in portable fume extraction, with systems for a wide variety of sectors including laser, 3D printing, and electronics.

**DELVO** (Nitto Kohki) - offers high-quality electric screwdriver tools for professional use, emphasizing precise torque control and long-term reliability. Delvo allows you to get it right every time, featured with repeatable accuracy, reduced recoil, long life, brushless motors, high-speed motors, and quiet operation. We have many sizes and types in stock for demonstration at your facility. Ask for more info.

**DESCO INDUSTRIES** - offers turn-key ESD control products used in the electronics production industry & made in the USA. Products range from static control matting, wrist straps, continuous monitors, resistance meters, testers, smocks, bags, labels, foot grounders, ionization, and much more. We are Desco factory trained representatives & offer you a no charge ESD Site survey/audit of your facility in review of compliance to the ANSI/ESD S20.20

**DESPATCH INDUSTRIAL OVENS** (ITW EAE) - a global leader in high-performance industrial ovens & furnaces, focused on commitment to the electronics, healthcare, materials, transportation, and industrial markets. Despatch has a broad offering of industrial processing ovens that include laboratory, benchtop, Class A, heat treat, conveyor, curing, depyrogenation, clean process HEPA filtration, reach-in, walk-in, truck-in, and more.

**EMIT** (DESCO) - specializes in the manufacturing of ESD control products including monitors, ionizers, testers, verification equipment and software for ESD Control Plan management. EMIT's products are made in the USA. Well known products are the Combo Tester X3, Smartlog Pro 2, and full-room ceiling mounted ionization. Ask about a product demonstration.

**HEPCO** - offers lead-forming equipment & solutions from single-stroke forming to bowl-fed systems. They recently expanded to include PCB de-paneling equipment for routed PCBs & a new BGA Sphere Placement System, which uses vacuum pick-up & placement of spheres for an entire array at once.

**HOVER-DAVIS** - "The Feeder Company" provides world-class component placement feeding solutions for global electronics assembly. For your traceability needs, Hover-Davis has the AXIUM Media Presenter; a flexible alternative for placing labels automatically w/existing pick-and-place machines.

**KM USA** - not only provides crimping applicators and presses with the longest warranties in the industry, but also a variety of wire processing equipment at affordable prices. Known for their unmatched service, you can depend on them to provide the quality products you need to keep the operation running. Local, based in Charlevoix, Michigan, they offer exceptional turn around time for parts and support. We can provide customized solutions for cut, cut & strip, cut-strip-crimp, laser cutting & stripping, crimping, connector insertion, splicing, pin insertion, wire spooling, and much more.

**MENDA (TRONEX, EASY BRAID, BEAUTECH)** - A division of Desco, Menda offers ESD products for your workbench such as the famous dissipative pump bottle, brushes, drinking cup, nylon probes, badge holders, and more. Tronex offers high-quality precision hand tools (cutters and pliers). Easy braid offers environmentally safe desoldering braid and other PCB assembly supplies. Beatech offers MilProbes, soldering aids, and spudgers.

**MID AMERICA TAPING AND REELING** - specializes in SMD, Axial & Radial Taping, Forming, Baking, Programming, and Lead tinning services. Also thermoform carrier tape pockets and trays, injection mold take-up reels in various sizes, along with PSA and heat cover tape, desiccant, and HIC cards.

**NEXGEN / 59S** - offers the next generation of UV sanitizing light. The light bulbs/fixtures are dual purpose...usable light when a proximity sensor detects motion, and then a UV sanitizing light with automatic disinfection when no motion or a timer is met. Various bulb sizes and fixtures are available, such as BR30, A19/A60, LED Panel lights, LED down-lights, UFO LED Lights, disinfection chambers, and HVAC LED air sterilizers. Ask about a demo!

**NATHAN TROTTER** - a prime source for high purity and best availability for tin solder alloys in North America since 1789. Offering solder bar, solder wire, specific solder wire for plumbing, (Sn97Cu3) in compliance with the US EPA 2020 Lead-Free Safe Drinking Water Act.

**PROLINE** - pride in the leading edge of modular ergonomics, based in Haverhill MA. Not just another workbench manufacturer....they offer customizable solutions at reasonable prices as well as chairs, belt conveyor stations, fixed ball transfer tables, height adjustable tables, bins, carts, lab furniture (cabinets, drawers), and more.

**PROTEKTIVE PAK (DESCO)** - manufacturing ESD Packaging solutions, specializing in a unique impregnated, static dissipative corrugated material for over 30 years. Need stronger packaging than corrugated? No problem! We also have fluted Plastek made from extruded, high impact polypropylene material, and the newest, strongest ENDURA-TEK which is extruded honey-comb structure of high impact polypropylene material yielding superior strength and durability. Ask for an in-person demonstration today.

**RAPIDTHERM** - specializes in the manufacture of environmental test chambers. Their design provides an energy-efficient single-zone chamber utilizing a patented thermal storage system to achieve extremely fast air temperature change rates. These chambers can be used for thermal shock testing with the advantage of no basket transfer system and no liquid nitrogen requirement.

**STATGUARD FLOORING (DESCO)** - specializes in ESD Flooring Products, manufactured at the Canton, MA facility. Their offering includes: Statguard floor finish, low VOC floor finish, stripper, neutralizer, floor cleaner, spray buff and burnishing restorer. Statguard Flooring's resilient flooring products include: ESD vinyl tiles, rubber tile, rubber rolls, carpet tile, conductive adhesives, ground strips, conductive epoxy, and conductive paint solutions.

**T.R.I. - TEST RESEARCH INNOVATION** - offers automatic test and inspection solutions: SPI, AOI, 3D AXI systems, MDA, and ICT equipment. TRI also provides PCB AOI systems used in PCB mfg and IC Test equipment.

**XDRY** - prides themselves in rapid recovery dry cabinets with ultra-low relative humidity storage for moisture sensitive devices such as: Electronics, PCBs, Optics, Cameras, Laboratory equipment and supplies. The greatest feature is that no nitrogen is needed. Desiccant dry cabinets are also known as desiccators, dry boxes, dehumidifying cabinets, and ultra low humidity storage cabinets.

**XURON** - offers over 100 various precision hand tools, including Micro-Shear® Flush Cutters, Pliers, Forming Tools, Wire Strippers, Micro-Pneumatic™ Cutters, and Scissors. As a XURON trained and authorized representative for over 40 years, we can offer in-person product demonstrations and help you select the right tool for the job.
